Facts on the Makers

[Key Numbers]

10+ devs

Seasoned Full-stack ReactJS developers

Berlin based

Honing our craft by working with Berlin startups

est. 2018

We're in it for life

[The Partners]

Carl-Petter

Packs close to two decades of experience. He made his first website in the late 90s and never really stopped, although the tech changed to ReactJS. If what you do is what you love, it's not work.

Korneliusz

Managing Director and a seasoned software engineer. Main interests lie in cloud architecture, frontend/react development and blockchain with its related intricacies. It's always a bull market for an optimist.

Mateusz

Over 10+ years of experience which includes conference speaking and authoring of courses. Headless E-commerce and Shopify are close to his heart, together with React of course.

How we work

Agile, product focus, etc — you've probably heard it all. In a nutshell - we're pragmatic.

[Experts Only]

All projects have a partner-level developer involved in addition to the regular senior full-stack developers.

[Weekly Syncs]

We can setup regular face-to-face weekly meets to demo dev work as well as discuss new tasks.

[Efficiency & Communication]

We keep you up-to-date asap and commit to full transparency using Slack, Video, Email & PM tools + any tool of your own choice.

[We share our knowledge]

We built hundreds of applications, saw many products fail and many succeed. We will speak up if we recognise familiar patterns.

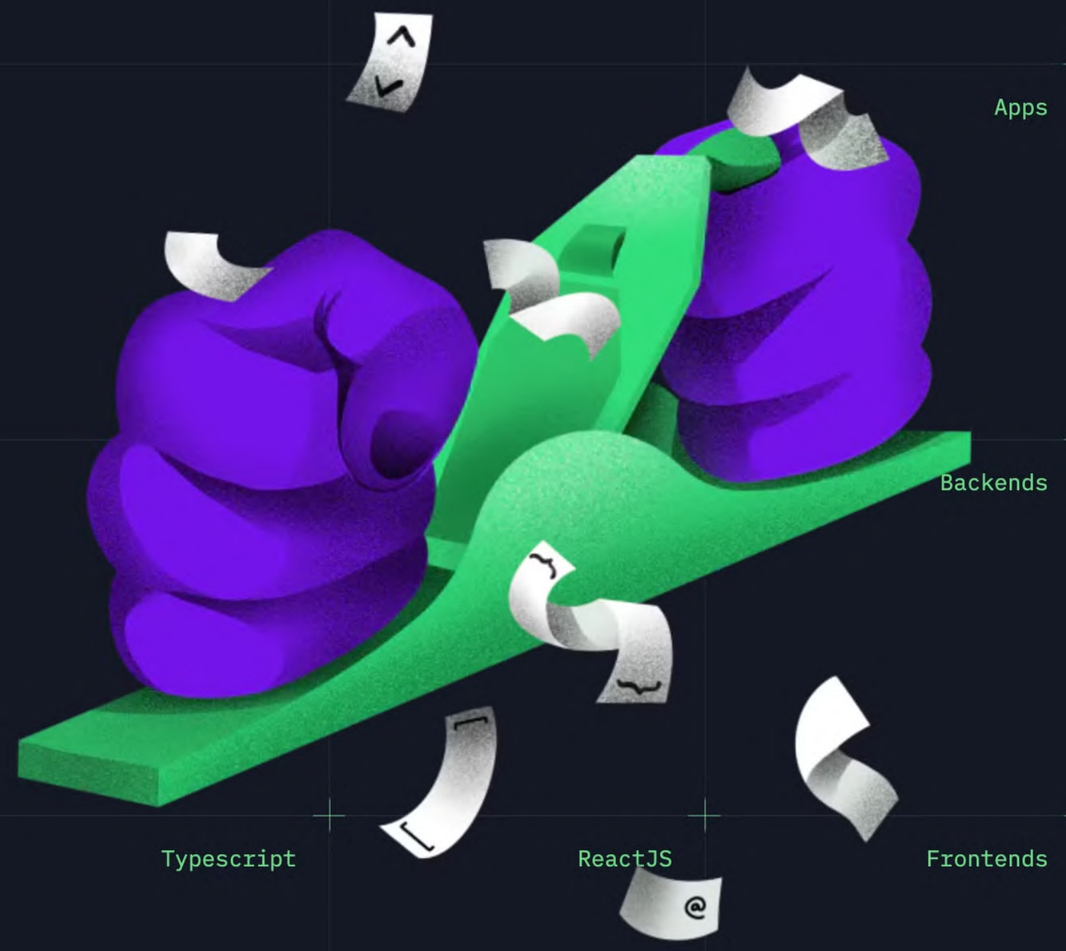
PROJECTS WE ARE PROUD OF



[Selected Former Clients]

OLX GROUP ATOMICHUB Klarna.

Try Pitch

OLX GROUP

OLX — Global classified ads platform

OLX faces unique challenges in ensuring customer safety and content quality. We developed frontends for moderation teams across the global company.

[ReactJS, GraphQL]

> Makers' Den plays a key role in building our centralized moderation system, integrating multiple user and content moderation flows from all our global verticals. They are delivery-focused, consistently shipping high quality solutions. We found in them a partner we can trust to make the right architectural, technological and personnel decisions to best support our business interest.

Till Riffert
Head of Product

ATOMICHUB

AtomicAds — Leading Ads platform for NFTs

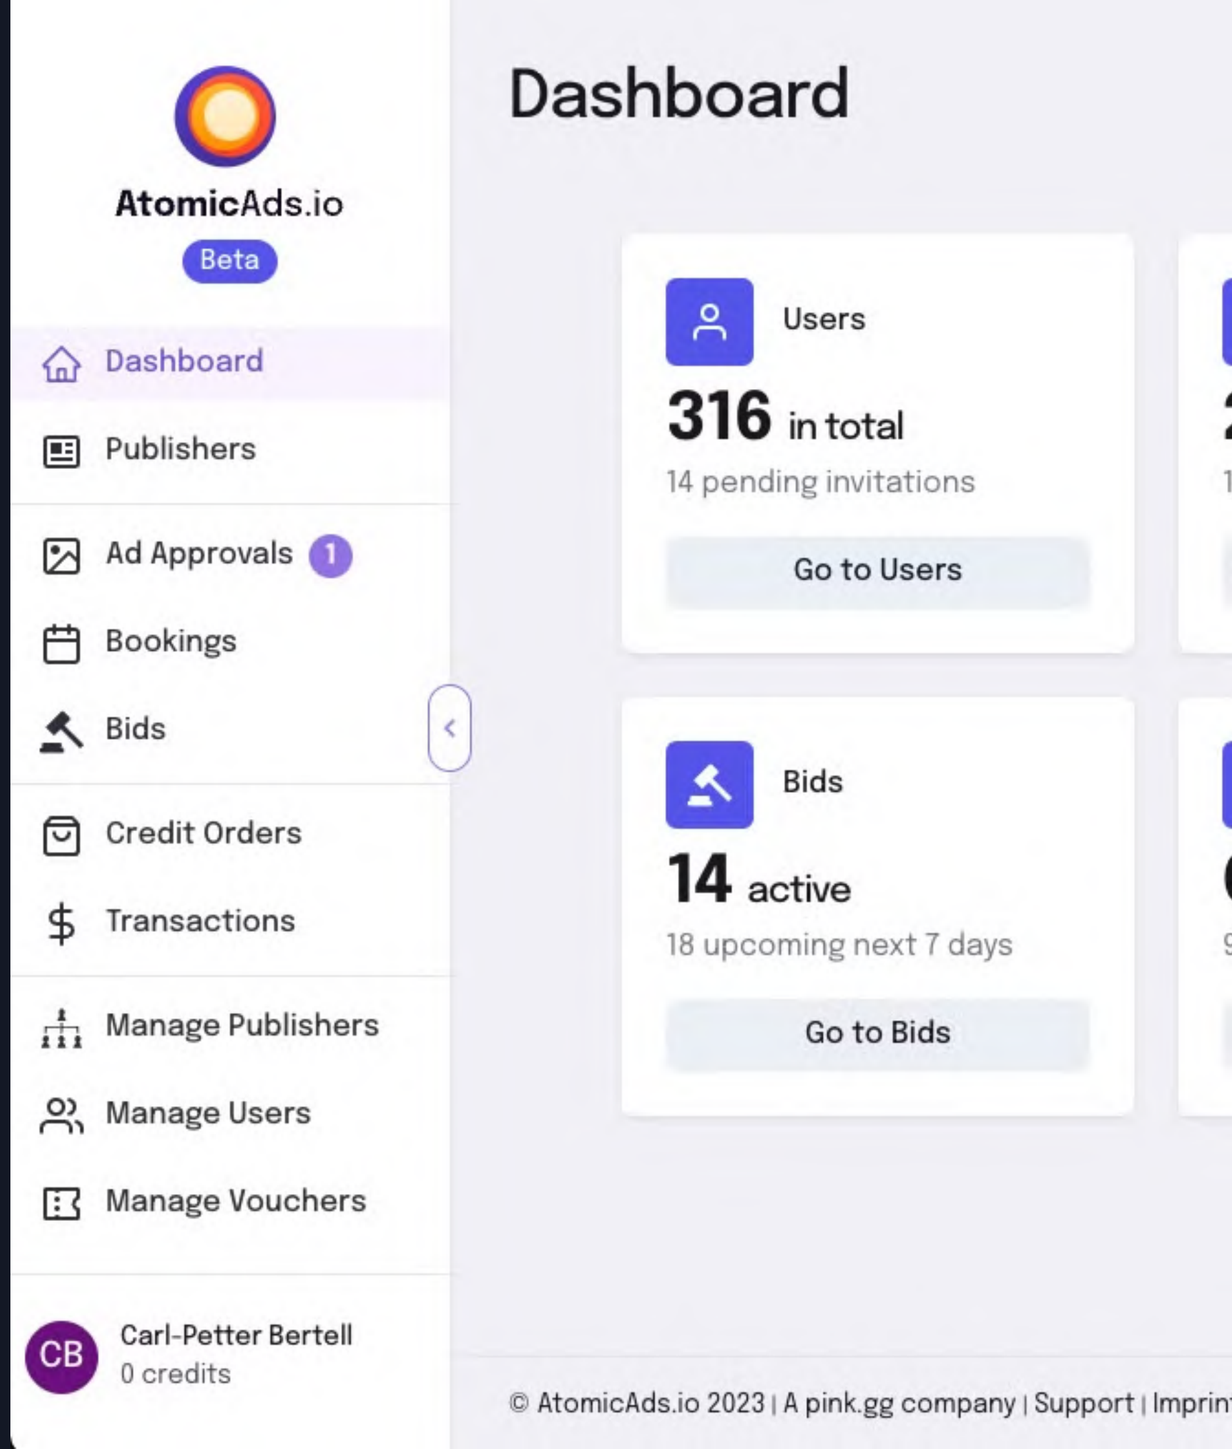
How do you create an ads platform? One step at a time - and leveraging a ReactJS/Typescript/NodeJS/Prisma/PSQL stack to iterate it fast. We helped **AtomicHub** launch AtomicAds.io by delivering vertical slices of functionality at a steady pace.

`[ReactJS, Typescript, PSQL]`

> *"Makers' Den helped us co-create and iterate our ads platform. They've proven to be stellar product-oriented developers, taking ideas one day and making them reality the next."*

Martin Harder
Business Development Lead

Try Pitch



Klarna.

Klarna – Bespoke payment solutions for big brands

We supported **Klarna** with starting a new “Custom Solutions” team with the purpose of building bespoke payment solutions for global high profile brands. ReactJS/Typescript/Full-stack was the name of the game.

`[ReactJS, NodeJS, Typescript]`

> Makers’ Den enabled us to hit the ground running conducting special projects with our enterprise clients. Their engineers provided excellent on-site technical expertise, communication, and a culture of transparency and consistent delivery for a full year”

Stefan de Lange
Head of Global Enterprise
Custom Solutions
